## PHONOLA 5585 - 5585 F

### ISTRUZIONI MONTAGGIO CORDINA

**MONTAGGIO DELLA CORDINA PER LO SPOSTAMENTO DELL'INDICE.**

A un pezzo di cordina di seta della lunghezza di circa mm 720 praticare 3 piccoli nodi ad asola e precisamente: uno ad una estremità, un secondo a mm 215 del primo ed un terzo alla estremità opposta in modo che la lunghezza netta totale della cordina a nodi eseguiti risulti di mm 510.

Ancorare l'asola intermedia delle cordine all'apposito dentello della puleggia, come indicato in figura.

Col tratto più corto avvolgere la puleggia girando da sinistra a destra, passare sull'alberello e avvolgerlo con due spire complete. Col tratto più lungo girare sulla puleggia in senso opposto, passare sulle 2 carrucate e unire i due capi della cordina intercalandovi la molla.

**MONTAGGIO INDICE.**

Con condensatore variabile in posizione di tutto chiuso inserire l'indice sulla cordina e mettere lo chassis nel mobile. Far scorrere l'indice fino a coincidere con l'inizio della graduazione della scala e fissarlo alla cordina schiacciando il dentello centrale.
